

## Risk Assessment of GFA Certification GmbH concerning options to replace on-site audits by remote audits due to the coronavirus COVID 19

### Risk assessment related to replacement of on-site audits by desk audits COVID 19 (global without China)

Date	Source	Risk declaration
16.03.2020	WHO Corona Virus Report 55	Very high health risk at global scale
16.03.2020	RKI Risikobewertung	High health risk regions in Italy, Spain, France, Germany, Austria, USA, South Korea, China, Iran
16.03.2020	John Hopkins University	High and fast rising number of infections in China, Iran, South Korea, USA, Italy, Germany, France, Switzerland, Spain and many more European countries.
16.03.2020	German Ministry of foreign affairs	Global travel warning for not necessary travels, reference to fast changing and rising travel restrictions.
16.03.2020	IATA immigration travel information	Special immigration rules and restrictions in more than 100 countries, situation is changing constantly and rapidly.
16.03.2020	International press	Many countries have immigration stops (USA, many European countries, Vietnam, others), situation is becoming worse fast, many scientists and politicians recommend social distancing to reduce the speed of spreading COVID 19, many countries including Germany close public and private places.
16.03.2020	GFA emails	Many CHs cancel the audit as they stopped operations or do homeoffice or are afraid that external visitor will bring infection cases to their companies, many companies restricted the access for any external people to their premises.
<b>16.03.2020</b>	<b>Conclusion</b>	The health situation and travel restrictions applied in the <b>EU, Switzerland and the USA</b> do not allow traveling and on-site auditing. GFA will switch to <b>desk based audits in these areas for all cases not exempted by SSP_PRO_Desk_Audits until further notice</b> . For all other regions individual evaluations of the conditions will be conducted. This is permitted by <b>FSC_DER_2020_001 18.03.2020</b> .
23.03.2020	Updated sources above	No significant changes to situation, some more countries closed borders for non-residents (e.g. Chile, Costa Rica). <b>Conclusion maintained.</b>
01.04.2020	Updated sources above	No significant changes to situation, RKI excluded China from international risk areas, IATA reports almost every country having immigration restrictions, many countries do not allow foreigners to enter at all without 14 days quarantine. "Lock downs" in Germany and many other countries. <b>Conclusion maintained.</b>
07.04.2020	Updated sources above	No significant changes to situation, RKI added Netherlands, UK and Ireland to international risk areas, Germany still entire country as risk area, IATA reports almost every country having immigration restrictions, many countries do not allow foreigners to enter at all without 14 days quarantine. Russia raised April as payed leave month. Number of infections globally still raising significantly. "Lock downs" in Germany and many other countries. <b>Conclusion maintained.</b>
13.04.2020	Updated	RKI withdrew the identification process for

	sources above	international/national risk areas on 10.04.2020 as there is global risk due to the fact that more than 200 countries are affected, the risk of becoming infected is at global scale, IATA reports almost every country having immigration restrictions, many countries do not allow foreigners to enter at all without 14 days quarantine. Number of infections globally still raising significantly. "Lock downs" in Germany and many other countries. <b>Conclusion maintained.</b>
19.04.2020	Updated sources above	RKI changed documentation to Situation Report where the risk for German population is considered to be high to very high and international risk areas are no longer differentiated as there is currently a global risk for acquiring COVID19. WHO still calls very high risk at global level. IATA travel restriction report unchanged. Number of infections globally still raising significantly. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations. <b>Conclusion maintained.</b>
27.04.2020	Updated sources above	RKI judges the risk for German population is considered to be high to very high and international risk areas are no longer differentiated as there is currently a global risk for acquiring COVID19. WHO still calls very high risk at global level. IATA travel restriction report unchanged. Number of infections globally still raising significantly. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations. "Lock downs" in Germany and many other countries. <b>Conclusion maintained.</b>
04.05.2020	Updated sources above	RKI judges the risk for German population is considered to be high to very high and international risk areas are no longer differentiated as there is currently a global risk for acquiring COVID19. WHO daily situation reports still show global emergency situation which is not under control. IATA travel restriction report unchanged. John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. "Lock downs" in Germany and many other countries. <b>Conclusion maintained.</b>
11.05.2020	Updated sources above	RKI judges the risk for German population is considered to be high to very high and international risk areas are no longer differentiated as there is currently a global risk for acquiring COVID19. WHO daily situation reports still show global emergency situation which is not under control. IATA travel restriction report unchanged. John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. "Lock downs" in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be

		impacted. <b>Conclusion maintained.</b>
19.05.2020	Updated sources above	RKI despite decreasing infection and death rates in Germany still judges the risk for German population as considered to be high to very high (for risk groups) and recommends to minimize contacts in private and professional life as much as possible. WHO still reports strong increase in infections and death globally, several trials of treatments against COVID19 are tested but not proven to be effective, new IATA interactive map show that almost all countries worldwide have either totally restrictive or partially restrictive travel restrictions which may change quickly, John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. "Lock downs" in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be impacted. <b>Conclusion maintained.</b>
25.05.2020	Updated sources above	RKI despite decreasing infection and death rates in Germany still judges the risk for German population as considered to be high to very high (for risk groups) and recommends to minimize contacts in private and professional life as much as possible. Restaurants may open again in Germany under strict hygiene rules. WHO still reports strong increase in infections and death globally, several trials of treatments against COVID19 are tested but not proven to be effective, new IATA interactive map show that almost all countries worldwide have either totally restrictive or partially restrictive travel restrictions which may change quickly, John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. Situation in Germany improves in comparison to many other European countries, USA still huge increase in infection and death rates. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. Social distancing rules in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be impacted. Restaurants may open again in Germany under strict hygiene rules. Individual outbreaks due to restaurant visits or church gatherings. <b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany under strict adherence to the current hygiene and behavior rules.</b>
02.06.2020	Updated sources above	RKI: "At the global and the national level, the situation is very dynamic and must be taken seriously. The number of newly reported cases is decreasing. The RKI currently assesses the risk to the health of the German population overall as high and as very high for risk groups." WHO still reports strong increase in infections

		<p>and death globally. IATA interactive map show that almost all countries worldwide have either totally restrictive or partially restrictive travel restrictions which may change quickly. John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. Situation in Germany improves in comparison to many other European countries, USA still huge increase in infection and death rates. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. Social distancing rules in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be impacted. Restaurants may open again in Germany under strict hygiene rules. Individual outbreaks due to restaurant visits or church gatherings.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany under strict adherence to the current hygiene and behavior rules.</b></p>
08.06.2020	Updated sources above	<p>RKI: "At the global and the national level, the situation is very dynamic and must be taken seriously. The number of newly reported cases is decreasing. The RKI currently assesses the risk to the health of the German population overall as high and as very high for risk groups." RKI reports larger individual outbreaks in 4 cities. Rules of social distancing still apply in Germany, but infection cases re decreasing despite of lifting of some measures. WHO still reports strong increase in infections and death globally. GFA key markets apart from China still belong to areas with medium to very strong infection rates, IATA interactive map show that almost all countries worldwide have either totally restrictive or partially restrictive travel restrictions which may change quickly. John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. Situation in Germany improves in comparison to many other European countries, USA still huge increase in infection and death rates. German Auswärtiges Amt still calls out a global travel security warning referring to unpredictable und constantly changing situations which was already extended to Mid of June 2020. Plans announced to lift travel warning within EU from 15.06.2020. Social distancing rules in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be impacted. Restaurants may open again in Germany under strict hygiene rules.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b></p>
15.06.2020	Updated sources above	<p>RKI: "At the global and the national level, the situation is very dynamic and must be taken seriously. The number of newly reported cases is decreasing. The RKI</p>

		<p>currently assesses the risk to the health of the German population overall as high and as very high for risk groups.” RKI reports larger individual outbreaks in several states, including meat processing plants, logistics companies, seasonal harvesting workers, religious events and family gatherings. Rules of social distancing still apply in Germany, but infection cases decreasing despite of lifting of some measures. WHO still reports strong increase in infections and death globally. GFA key markets apart from China still belong to areas with medium to very strong infection rates, WHO and media report new Coronavirus outbreak on a market in Beijing, IATA interactive map show that almost all countries worldwide have either totally restrictive or partially restrictive travel restrictions which may change quickly. John Hopkins Institute Dashboard shows that number of infections globally still raising significantly. Situation in Germany and other European countries improves, USA, Brazil, Russia, India, UK are heavily impacted, many Latinamerican countries are heavily impacted, German Auswaertiges Amt lifts travel warning for some European countries (excluding Spain, Skandinavian Countries, UK/Ireland but extends travel warning for all other countries until 31.08.2020, Social distancing rules in Germany and many other countries however slight ease in requirements visible in some countries (France, Spain, Germany,.....) but unclear how spreading of corona virus will be impacted. Restaurants may open again in Germany under strict hygiene rules.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b></p>
23.06.2020	Updated sources above	<p>RKI: Situation unchanged. WHO: Situation unchanged. IATA: Situation unchanged. John Hopkins University: Situation unchanged. German Auswaertiges Amt: Situation unchanged. Still social distancing rule in Germany and other countries applicable. New individual outbreaks reported in press media and by RKI (e.g. Meat Processing Plant Tönnies with more than 1.500 new cases).</p> <p><b>General conclusion from 16.03.20 maintained. 21.07.2020	Updated sources above	RKI: Situation unchanged. WHO: Situation unchanged. IATA: Situation unchanged. John Hopkins University: Situation unchanged. German Auswaertiges Amt: Situation unchanged. Still social distancing rule in Germany and other countries applicable. New individual outbreaks reported in press media and by RKI (e.g. refugee camps, meat processing plants). <b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b>
27.07.2020	Updated sources above	RKI: Situation unchanged, but situation may even get worse since stated: <i>“In the past few weeks, the number of districts that have not submitted any COVID-19 cases over a period of 7 days has decreased continuously. In parallel, the COVID-19 incidence has risen in many federal states. This situation is worrying.”</i> WHO: Situation unchanged. IATA: Situation unchanged. John Hopkins University: Situation unchanged. German Auswaertiges Amt: Situation unchanged. Still social distancing rule in Germany and other countries applicable. New individual outbreaks reported in press media and by RKI (e.g. refugee camps, meat processing plants). General rise of infection cases in Germany and other European countries e.g. Spain) reported. Media discussion about coming of second infection wave. <b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European</b>

		<b>countries under strict adherence to the current hygiene and behavior rules.</b>
03.08.2020	Updated sources above	<p>RKI: <i>“An increase in COVID-19 case numbers since last week occurred in many of the federal states. Nationwide, there are many smaller case outbreaks in different administrative districts in various settings, such as larger family events, leisure activities, occupational settings, but also in community and health facilities. In addition, COVID-19 cases are increasingly being identified among people returning from travel abroad. The number of new cases reported daily has been increasing since last week. This development is very concerning and will continue to be monitored very closely by the RKI. A further worsening of the situation must be avoided. This will only succeed if the entire population continues to be committed to decreasing transmission, e.g. by consistently observing rules of distance and hygiene - also in outdoor settings -, by airing indoor areas and, where necessary, wearing a community or face mask correctly.”</i> WHO: Situation unchanged. IATA: Situation unchanged. John Hopkins University: Situation unchanged. German Auswärtiges Amt: Travel warnings for all countries outside of the EU + some countries inside EU showing more than 50 new infections per 100.000 capita in last 7 days, travel warnings and restrictions may change quickly and are effective without prior warnings. Press media: General rise of infection cases in Germany and other European countries e.g. Spain) reported. Media discussion about coming of second infection wave.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b></p>

23.11.2020	Updated sources above	<p>RKI: Further increase worldwide and in Germany, risk still high to very high. WHO: "The number of new cases being reported globally continues to rise (Figure 1), with almost 4 million new cases in the past week (9–15 November) alone. The number of new deaths globally has also grown by 11%, with almost 60 000 new deaths reported, of which 81% were in Europe and the Americas (Table 1). Although the European Region continues to report the highest number of new cases globally (46%), it has seen a 10% fall in the past week following the strengthening of public health and social measures across the region. However, the number of new deaths in Europe has increased substantially with over 29 000 new deaths reported in the past week. The Region of the Americas reported a sharp upward trend, with a 41% increase in new cases in the past week. The Eastern Mediterranean, African and Western Pacific Regions also reported increases in the number of new cases. The South-East Asia Region, on the other hand, reported a decline in the number of new cases and new deaths."; worldmap showing infection cases per country show all countries where GFA is active having significant number of cases (apart from China currently), last report published 17.11.20). IATA: Still all countries where GFA is active with totally restrictive or partly restrictive travel restrictions. John Hopkins University: Still strongly increasing infection rates globally. Majority of currently active cases in Europe, India and the Americas. German Auswärtiges Amt: Travelwarning for countries showing more than 50 per 100.000 in 7 days and for countries with restrictive or partly restrictive immigration requirements (compare designated risk areas and IATA). Press Headlines: Overall globally increasing infection numbers, political debates about increasing / extending local lockdown measures in some countries, several promising vaccination developed not endorsed yet, however experts consider it to take mid/end 2021 until sufficient people are vaccinated.</p> <p><b>General conclusion from 16.03.20 maintained. 15.03.2021	Updated sources above	<p>RKI: “In view of persistently high case numbers, the RKI currently assesses the threat to the health of the general population to be very high.” WHO: “Over 2.7 million new cases were reported last week, a 2% increase compared to the previous week (Figure 1). The global case increase was driven by increases in the Eastern Mediterranean (10%), African Region (10%), and Europe (4%), while small declines were seen in the Americas (-2%), South-East Asia (-2%) and Western Pacific regions (-6%). Globally, around half of countries are seeing declines while the other half are experiencing increasing numbers of new cases. Global new deaths continued the downward trend observed since early February 2021, declining a further 6% compared to last week. Death rates declined in all regions except in the Eastern Mediterranean, where new deaths reported rose by 9%. The Americas and Europe account for around 80% of new cases and new deaths reported globally.”, worldmap showing infection cases per country show all countries where GFA is active having high to very high numbers of cases apart from China currently (last report published 09.03.2021). IATA: Still all countries where GFA is active with totally restrictive or partly restrictive travel restrictions. John Hopkins University: Still strongly increasing infection rates globally, however a declining trend is indicated.</p>

		<p>Majority of currently highest incidence rates in Europe, Russia, India and the Americas. German Auswärtiges Amt: Travelwarning for countries showing more than 50 per 100.000 in 7 days and for countries with restrictive or partly restrictive immigration requirements (compare designated risk areas and IATA). New categories “areas of variant of concern” and “high incidence areas” have been added: Press Headlines: Discussions and debates about progress of vaccination programs, again increasing incident rates, discussions about third wave coming due to new mutant virus, new lockdowns being discussed in several countries.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b></p>
22.03.2021	Updated sources above	<p>RKI: <i>“In view of persistently high case numbers, the RKI currently assesses the threat to the health of the general population to be very high.”</i> WHO: <i>“New cases continue to rise globally, increasing by 10% in the past week to over 3 million new reported cases (Table 1). The number of new cases peaked in early January 2021 when there were just under 5 million cases reported in one week. New cases then declined to just under 2.5 million cases by the week commencing 15 February. However, for the past three weeks new cases have increased. This week, the Americas and Europe continue to account for over 80% of new cases and new deaths, with rises in new cases seen in all regions apart from Africa, where incidence rates decreased by 4%. New deaths on the other hand continue to decline and are now under 60 000, since peaking in the week commencing 18 January (when there were over 95 000 new deaths in the week). The last time when there were fewer than 60 000 new weekly deaths was four months ago, in the week commencing 9 November. This week, although new deaths declined globally, they rose in two WHO regions; the Eastern Mediterranean (by 3%) and the Western Pacific (by 14%).”</i>, worldmap showing infection cases per country show all countries where GFA is active having high to very high numbers of cases apart from China currently (last report published 16.03.2021). IATA: Still all countries where GFA is active with totally restrictive or partly restrictive travel restrictions. John Hopkins University: Still strongly increasing infection rates globally, the declining trend from past weeks changed to increasing trend. Majority of currently highest incidence rates in Europe, Russia, India and the Americas. 18.10.2021	Updated sources above	<p>RKI: <i>“Since July 16, 2021, the Robert Koch Institute has continued to classify the health risk of the non-vaccinated or incompletely vaccinated population in Germany as high, in particular due to the increasing spread of some worrying SARS-CoV-2 variants and the not yet sufficiently high vaccination rate. The number of cases, which is currently rising again, gives cause for concern. For those who have been completely vaccinated, the risk is assessed as moderate.”</i> WHO: <i>“Globally, the numbers of weekly COVID-19 cases and deaths have continued to decline since late August (Figure 1). Over 2.8 million new cases and over 46 000 new deaths were reported during the week of 4 to 10 October 2021, representing decreases of 7% and 10% respectively, as compared to the previous week (Table 1). Apart from the European Region, which reported a 7% increase in the number of new weekly cases as compared to the previous week, all the other regions reported declines in new weekly cases. The largest decrease in new weekly cases was reported from the African Region (32%), followed by the Western Pacific Region (26%). The cumulative number of confirmed cases reported globally is now over 237 million and the cumulative number of deaths is over 4.8 million. The number of new weekly deaths reported showed a large (&gt;10%) decline for all regions except for the European Region, which reported an 11% increase as compared to the previous week. The largest decline in weekly deaths was reported from the Western Pacific and the African Regions, with both showing declines of 34% as compared to the previous week.”</i>, worldmap showing infection cases per country show a mix of low to very high numbers of cases. (last report published 13.10.2021). IATA: Still all countries where GFA is active with totally restrictive or partly restrictive travel restrictions. John Hopkins University: Plateauing and decreasing infection and death rates at high level. Majority of currently highest incidence rates in Russia, India, Europe and the Americas. German Auswärtiges Amt: Travelwarning for risk countries being high incidence or variant of concern areas and a no travel recommendation for countries with restrictive or partly restrictive immigration requirements (compare designated risk areas and IATA). Press Headlines:</p>

		<p>Discussions and debates about progress of vaccination programs.</p> <p><b>General conclusion from 16.03.20 maintained. In case of mutual agreements between Certificate Holders and GFA Auditors, on-site audits may be conducted in Germany and other European countries under strict adherence to the current hygiene and behavior rules.</b></p>
25.10.2021	Updated sources above	<p>RKI: “Since July 16, 2021, the Robert Koch Institute has continued to classify the health risk of the non-vaccinated or incompletely vaccinated population in Germany as high, in particular due to the increasing spread of some worrying SARS-CoV-2 variants and the not yet sufficiently high vaccination rate. The number of cases, which is currently rising again, gives cause for concern. For those who have been completely vaccinated, the risk is assessed as moderate.” WHO: “With just over 2.7 million new cases and over 46 000 new deaths reported during the week of 11 to 17 October 2021, the global number of new cases and deaths remained similar to that of the previous week (Figure 1). Apart from the European Region, which reported a 7% increase in the number of new weekly cases when as compared to the previous week, all the other regions reported declines in new weekly cases (Table 1). The largest decrease in new weekly cases was reported from the African Region (18%), followed by the Western Pacific Region (16%). The cumulative number of confirmed cases reported globally is now over 240 million and the cumulative number of deaths is just under 4.9 million. The African Region also reported the largest decline in weekly deaths (25%) followed by the South-East Asia and Eastern Mediterranean Regions with 19% and 8% declines, respectively. All other regions reported new deaths in numbers similar to those of the previous week.”, worldmap showing infection cases per country show a mix of low to very high numbers of cases.
